22	Step 5	Reads: 5. Repeat steps 3 and 4 to create another account named SQL2008TK432SQLAgent. Should read: 5. Repeat steps 3 and 4 to create another account named SQL2008TK432SQLAgent, and again to create an account named SQL2008TK432FullText.		7/22/2011
24	Top of page	Step 8 comes after step 9. The steps should change place.		7/22/2011
25	Step 6	Step 6 is not required because the current AdventureWorks database installers from the CodePlex website install the database without the need for any additional tasks. This step should be removed and step 7 should be renumbered as step 6.		7/22/2011
25	Practice 3, step 2	Reads: ...AdventureWorks2008*.msi... Should read: ...AdventureWorks2008_SR4.exe...		7/22/2011
27	Lesson Review, question 2, answer C	Reads: QL Server Configuration Manager Should read: SQL Server Configuration Manager		7/22/2011
27	Lesson Review, question 1	This question should be removed.		7/22/2011
29	Step 1 code	Reads: EXEC sp_configure 'Database Mail XPs',1 GO RECONFIGURE WITH OVERRIDE GO Should read: sp_configure 'show advanced options', 1; GO RECONFIGURE WITH OVERRIDE; GO EXEC sp_configure 'Database Mail XPs', 1 GO RECONFIGURE WITH OVERRIDE; GO		7/22/2011
34	Case Scenario, question 3	Reads: ...of the bsuiness managers? Should read: ...of the business managers?		7/22/2011

Page	Location	Description	Date corrected
37	First paragraph, fourth line	Reads: You will also learn how check and manage the integrity of a database. Should read: You will also learn how to check and manage the integrity of a database.	7/22/2011
44	First step of the practice, first sentence	Should read: In this practice, you will create a database with multiple files that is enabled for FILESTREAM storage in the c:\test folder.	7/22/2011
66	Table 3-3	In the last column of each row, the phrase "…up to a maximum of [x] bytes. Should be in each instance: …up to a maximum of [x] characters	7/22/2011
72	Row size limitation list, first bulleted item	Reads: Reduce the data within a row so that the maximum row size is greater than 4,009 bytes Should read: Reduce the data within a row so that the maximum row size is less than 4,009 bytes	7/22/2011
74	Third paragraph	Reads: Both global and local temporary tables are dropped automatically when the connection that created the tables is terminated. Should read: Local temporary tables are dropped automatically when the connection that created them is terminated. Global temporary tables are dropped when the last connection using them is terminated.	7/22/2011
100	"Tessellation" section, first line	Reads: ...each row is read of spatial... Should read: ...each row of spatial…	7/22/2011
101	Quick Check reader aid, answer 2	The following text should be removed from the answer: intermediate and	7/22/2011
106	Practice section, step 2	Reads: AdventureWorks Should read: AdventureWorks2008	7/22/2011
140	Practice section, step 3, seventh line	Reads: 2MB Should read: 3MB	7/22/2011

Page	Location	Description	Date corrected
146	Thirteenth line from bottom of page	A period should be added after the word "applied".	7/22/2011
147	First line of code block at bottom of page	Reads: CREATE NONCLUSTERED INDEX idx_employeefirtname Should read: CREATE NONCLUSTERED INDEX idx_employeefirstname	7/22/2011
152	penultimate bulleted item	Reads: ...participatie in replication. Should read: ...participate in replication.	7/22/2011
203	First complete sentence on page	Reads: To continue past the error and back up as many pages as possible, you can specify the CONTINUE_PAST_ERROR option. Should read: To continue past the error and back up as many pages as possible, you can specify the CONTINUE_AFTER_ERROR option.	7/22/2011
217	"Restore a Corrupt Page" section, first paragraph, second sentence;	Reads: consistent Should read: inconsistent	7/22/2011
274	Code at top of page	Reads: GRANT VIEW DEFINITION <user> Should read: GRANT VIEW DEFINITION<user>	7/22/2011
283	Lesson Summary, last bulleted item	Reads: escalate Should read: elevate	7/22/2011
347	First line	Reads: Figure 12-11 Should read: Figure 12-13	7/22/2011
376	Resource Governor, third bulleted item, all instances	Reads: classifier function Should read: classification function	7/22/2011

Page	Location	Description	Date corrected
377	First paragraph, sixth and eighth lines	Reads: classifier function Should read: classification function	7/22/2011
411	Table 14-2	The first entry for Windows Server 2003 Standard Edition should be removed. There is no replacement or other correction.	7/22/2011
418	Practice section, step 6	Reads: Qqldata.vhd Should read: Sqldata.vhd	7/22/2011
425	Step 40 and Figure 14-10	Reads: LMHOSTS Lookup Should read: LMHOSTS lookup In Figure 14-1, the LMHOSTS lookup check box should be cleared.	7/22/2011
454	More Info reader aid	Reads: For more information about defining endpoints, please refer to Chapter 8, "Designing SQL Server Endpoints." Should read: For more information about defining endpoints, please refer to Chapter 11, "Designing SQL Server Endpoints."	7/22/2011
501	Sidebar, third paragraph, second line	Reads: ...12-14 hours or latency... Should read: ...12-14 hours of latency…	7/22/2011
546	"Case Scenario: Planning for High Availability" paragraph	The following text should be removed: before beginning the next chapter	7/22/2011
548	"Technical Requirements" section, first line	Reads: The Bookings and Customers databases... Should read: The Orders and Customers databases…	7/22/2011
561	Lesson 1, question 2, answer B, last word	Reads: Code Should read: Core	7/22/2011

Page	Location	Description		Date corrected

562	Lesson 3, answer 1	Reads:
		1. Correct Answer: D
		
		…
		    C. Incorrect: While sp_configure can be used to change the support level for FILESTREAM data, it does not allow full configuration of options such as the share name to be used.
		    D. Correct: sp_filestream_configure is used to enable the FILESTREAM access level as well as configure the Windows share to be used.
		
		Should read:
		1. Correct Answer: C
		
		…
		    C. Correct. Sp_configure is used to enable and change the support level for FILESTREAM.Data, it does not allow full configuration of options such as the share name to be used.
		    D. Incorrect. Sp_filestream_configure was a stored procedure that was included in an early beta version of SQL Server 2008. This was removed in favor of using sp_configure.
				7/22/2011

562	Lesson Review, question 1	The answer to question 1 under Lesson 3 is an answer that hasn't had it's concepts reviewed in the Lesson or Chapter and should be removed.		7/22/2011
567	Lesson 2, answer D, last line	Reads: ...the query could be satisfied entirely by the index. Should read: …the query could return data from the ProductAttributes table entirely from the index.		7/22/2011
